<https://github.com/TjArevalo>

Skills

Javascript, HTML5, CSS, React (React Bootstrap, Styled Components, Router, Axios, SASS, etc..) Redux, Google Firebase, DOM API's, Node.js, Express.js, Web API's, User Authentication, OAuth, GitHub, MySQL, AGILE, SCRUM, Jest, Jira, Trello.

Experience

February 2021- PRESENT

Dashboard, Waterloo, ON - Intern

- Adhered to an AGILE-SCRUM workflow, with tasks to be completed by week's end (Sundays)
- Worked with React and libraries such as Styled Components and React Router to create front end website components
- Worked with technologies like Express.js and MongoDB for backend data management, and authentication.

July 2019 - April 2020

Sound Technician, Vancouver BC - Sound Engineer

- Handled the set up, and tear down for band and DJ sets, utilizing basic electrical knowledge and knowledge of sound laws and safety regulations in order to minimize hazards and ensure artists could perform free of technical issues.
- Managed the live mixing of band performances and DJ sets through an understanding of various mixing consoles, both analogue and digital, to produce a sonically balanced live performance.
- Communicated with artists to achieve the sound that was unique to their brand.

Education

November 2020 - February 2021

Brainstation, Toronto ON - Web Development

April 2017- September 2018

Nimbus School of Recording Media, Vancouver, BC - Sound Engineering & Production
